○ github.com/IssamHeli

I am a skilled .NET Core developer with expertise in both frontend and backend technologies, focused on delivering seamless and efficient web applications. My frontend experience includes HTML, CSS, JavaScript, and frameworks such as Blazor, where I create intuitive user interfaces with dynamic forms, AJAX integration, and modern interactivity. On the backend, I work with ASP.NET Core Web API and MVC to implement business logic, handle requests, and ensure smooth communication between the frontend and database through RESTful APIs and middleware. I am proficient in using SQL Server for database management, leveraging Entity Framework Core for ORM and migrations. With experience deploying applications on Azure, I ensure high availability and scalability. I also utilize Visual Studio and GitHub for efficient development and version control.

Education

Jan 2020 - Dec 2022

développement informatique, développement informatique
office de formation professionnelle et promotion du travail
Honors: Good

Employment

Oct 2022 - Present

Développeur web
Freelance
